Performance Review

Objectives and Investment Strategies

The fundamental investment objectives of the IDEO+ Conservative Plan (hereinafter the “Plan”) consist of investing subscriber contributions and government grants in a diversified combination of investments according to a flexible investment strategy to generate a reasonable and competitive return on long-term investments while assuming a level of risk considered low. The subscriber is not guaranteed a full reimbursement of the contributions that were made. However, the flexible investment strategy provides for the adjustment of the asset allocation over the years to reduce exposure to risk as the beneficiary approaches the age of undertaking eligible postsecondary studies and thus promote the preservation of the capital accumulated over time.

The Plan funds are invested primarily in variable-income securities (equities, ETFs and mutual fund units), as well as fixed-income securities (government securities, corporate debt and money market securities). The flexible investment policy carries low investment risk over the entire investment period, as it employs an investment strategy that focuses more on fixed income and cash and cash equivalents than on variable-income securities.

The target distributions for each age group are:

Age of beneficiary	Cash and cash equivalents	Fixed-income securities	Variable-income securities	Maximum proportion of variable-income securities
0	5%	45%	50%	55%
1	5%	46%	49%	54%
2	5%	46%	49%	54%
3	5%	47%	48%	53%
4	5%	48%	47%	52%
5	5%	49%	46%	51%
6	5%	51%	44%	49%
7	5%	54%	41%	46%
8	5%	57%	38%	43%
9	5%	60%	35%	40%
10	5%	63%	32%	37%
11	5%	66%	29%	34%
12	5%	68%	27%	32%
13	5%	71%	24%	29%
14	5%	73%	22%	27%
15	5%	78%	17%	22%
16	5%	82%	13%	18%
17	5%	86%	9%	14%
18 and over	75%	25%	0%	5%

Kaleido Growth Inc. (hereinafter “Kaleido Growth”), is responsible for mandating the portfolio managers and ensuring their compliance with the investment policies developed in the best interest of subscribers and beneficiaries.

The Investment Committee, for its part, is responsible for developing the investment policies and establishing the mandates of the portfolio managers in collaboration with Kaleido Growth, and for recommending the approval of these investment policies to Kaleido Growth’s Board of Directors.

The management of assets is entrusted to the portfolio managers based on their areas of expertise. For the Plan, the fixed-income securities are managed by AlphaFixe Capital Inc. and by Monrusco Bolton Investments Inc., and the variable-income securities are managed by Monrusco Bolton Investments Inc.

Given the time horizon of a RESP, the general objective of the Plan consists of achieving a maximum long-term rate of return while maintaining a degree of risk deemed appropriate. Investments must always comply with applicable legislation and with the investment policies of the Kaleido Foundation (hereinafter the “Foundation”).

In 2023, the following market indices were used to assess the performance of portfolio managers:

Asset Classes

Fixed-income securities

Assets	Market Index
Cash and cash equivalents	91-Day Treasury Bills ¹
Government securities (provincial, federal and municipal)	FTSE TMX Canada Mid Term Provincial Bond Index
Corporate debt	FTSE TMX Canada Short Term Corporate Bond Index

¹ The 91-Day Treasury Bill Index is used for money market investments. Otherwise, the performance index is adjusted to that of a high-interest bank account.

Variable-income securities

Assets	Market Index
Canadian equities (large cap)	S&P/TSX Composite Index
Canadian equities (small caps)	S&P/TSX Small Cap
US equities (large cap)	S&P 500 Index (CAD)
US equities (small cap)	S&P 600 Small Cap Index (CAD)

Risk

The stock prices of the securities held by the Plan may fluctuate and affect the value of investments, thereby affecting the educational assistance payments (EAP) that the beneficiaries could receive. During the year, the investment strategy of the Plan remains focused on a long-term perspective and is intended for investors who wish to save for post-secondary education and who generally have a low risk tolerance. The risk factors are presented in the Plan's prospectus.

Operating Results for 2023

A RESP is, by definition, a long-term investment vehicle. Consequently, any performance analysis of RESP investments should be carried out in this perspective. For the year 2023, the Plan's portfolio generated a gross market value return of 6.52%. The total net return was 4.40% after deducting total administration and management fees of 2.12%. These fees include input taxes (GST/QST) on goods and services acquired to provide financial services.

In 2023, the administration fee rate was set at 1.65% plus taxes annually.

The following chart presents the gross return, the market index, and the added value for each investment policy as of December 31, 2023:

Asset Category	Gross Return	Market Index	Added Value
Fixed-income securities guaranteed by a government or municipality and corporate bonds	6.78%	6.51%	0.26%
Money market securities guaranteed by a Canadian government, or held as cash and cash equivalents	5.24%	5.24%	0.00%
Canadian and global equities	16.54%	17.30%	-0.76%

Assets of the IDEO+ Conservative Plan

Before the 60-day deadline after the contract is signed, the contributions and government grants are invested in cash and cash equivalents. At the end of the first 60 days, the income generated on contributions and grants, less applicable fees, will be allocated to the account.

The target allocation within each beneficiary age group with a flexible profile will change over time, and the income credited to the accounts will be allocated according to the respective profiles. A weighted target for fixed income, variable income, cash and cash equivalent asset classes will be determined on a monthly basis by weighting the investments in the different age groups with the targets set for the same age groups.

Two portfolio managers oversee these investments using different strategies, as shown in the chart below:

Portfolio Manager	Asset Category	Investment Strategy
AlphaFixe Capital Inc.	Fixed-income securities guaranteed by a government or municipality and corporate bonds	Bond strategy
Montrusco Bolton Investments Inc.		
Montrusco Bolton Investments Inc.	Canadian equities	Large cap
	U.S. equities	Small cap

Economic Overview

Canada's economic context

The Bank of Canada, like other central banks around the world, continued its restrictive monetary policy in 2023, with the primary aim of bringing the inflation rate closer to the target range of 1 % to 3 % on an annual basis.

Following the numerous rate hikes that marked the year 2022, the Bank of Canada kept up its momentum in 2023, albeit more moderately. In fact, the Bank raised its key rate three times by a further 0.25 %, most recently on July 12, 2023, bringing it to 5.00 %.

Inflation continued to fall in 2023, a sign that our monetary policy is producing the desired results. The consumer price index (CPI), which stood at 5.9 % at the start of 2023, fell to 3.1 % at the end of the year. The CPI peaked at 8.1 % in June 2022.

Faced with the challenges of inflation and rate hikes, the Canadian economy contracted in 2023. However, the economy continues to show a degree of resilience, thanks to a robust job market and strong demographic growth. After growing by 3.8 % in 2022 and 2.6 % in the first quarter of 2023, the Canadian economy contracted slightly in the second and third quarters. As a result, at the time of writing, preliminary estimates for Canada's GDP stood at 1.10 % for 2023, a significant decline compared to the 3.8 % increase recorded in 2022. The unemployment rate in Canada in November 2023 stood at 5.8 %, representing a slight increase on the 5.0 % recorded in December 2022.

Global economic context

In the U.S., the Federal Reserve (the Fed), which is responsible for American monetary policy, raised its key interest rate a total of four times, again to slow inflation and cool a heating job market, with the unemployment rate remaining very low at 3.7 %. As a result, the Fed raised rates by 100 basis points in 2023, bringing rates to a range of 5.25 % to 5.50 %.

The tightening of monetary conditions is beginning to bear fruit, with the inflation rate falling from 6.4 % at the start of 2023 to 3.1 % in November 2023.

In China, the government’s various stimulus policies and interventions have revived domestic demand, which had been weakened by the ailing real estate sector. The Chinese economy rebounded in 2023 with GDP growth of 5 %, a marked increase on the 3 % growth rate recorded in 2022.

In Europe, the eurozone is on track for a soft landing with estimated growth of 1.3 % for 2023, down from last year’s 2.7 %. The European Central Bank raised its key interest rate six times in 2023, from 2.5 % to 4.5 %.

Finally, the past year was marked by soaring prices for several commodities and raw materials, notably gold, coffee, cocoa, and orange juice. In addition to smaller harvests due to the war in Ukraine, climate upheaval is also a factor. Oil did less well, down by around 10 % over the year, with surplus production pushing down the price of a barrel of oil.

Bond market

The year 2023 began on an optimistic note, with the bond market anticipating possible rate cuts by central banks due to falling inflation. However, the market’s enthusiasm was dampened by inflation which, although falling, proved persistent in the first half of the year, ultimately pushing up bond yields and depressing bond prices. Fortunately, the last quarter saw bonds rise sharply on the back of encouraging economic news on the inflation front.

Finally, the bond market recorded gains of 6.6 % in 2023, as measured by the FTSE Universe bond index, contrasting positively with the significant 11.6 % decline experienced by the same index in 2022.

The yield curve spent most of the year in inverted mode, with bond yields on shorter maturities higher than those on longer maturities.

2023 Bond Market

Canadian Bond Index Performance			Canadian Rates and variations			Central Bank Rates as at December 31, 2022		
	2023	2022		Dec. 2023	Dec.2022		2023	2022
Universe	6.69%	-11.69%	Universe	3.94%	4.28%	Canada	5.00%	4.25%
Federal	5.00%	-9.34%	Short Term	4.09%	4.40%	United-States	5.50%	4.50%
Provincial	7.31%	-15.05%	Medium Term	3.61%	3.96%			
Corporate	8.37%	-9.87%	Corporate (High return)	7.07%	7.34%			

Stock market

Following major declines in the main indices in 2022, global stock markets rebounded in 2023, propelled in particular by technology stocks and the possibility of an interest rate cut materializing in early 2024. After a positive first six months, markets retreated for most of the next semester, before resuming an upward trajectory from November onwards and ending the year strongly.

In Canada, the S&P/TSX Composite Index, representing the Canadian market, recorded an 11 % increase for the year, contrasting favourably with the 5.8 % decline of 2022. The best-performing subsectors in the index were information technology (+69.2%), healthcare (+18.3 %) and finance (+13.9 %). Conversely, the subsectors that performed the least well were communication services (-3.9 %) and materials (-1.3 %).

The U.S. S&P 500 index climbed 24 % in 2023, close to its all-time high, propelled by technology sectors, particularly those linked to the emergence of artificial intelligence. The NASDAQ soared by more than 43 %, boosted by the “Magnificent Seven” tech giants such as Microsoft, Alphabet, Apple and Nvidia.

Elsewhere in the world, investors also did well, with the MSCI World composite index of global equities posting a positive return of 21 % over the year. The MSCI EAFE index representing the Europe-Asia region climbed 15.7 %, while the index representing emerging markets gained 7.3 %. Finally, in Japan, the Nikkei index of the Tokyo Stock Exchange rebounded by 28 % in 2023, its best annual performance in ten years.

Recent Events

There were no changes to the Plan in 2023.

Transactions Between Related Parties

Kaleido Growth, the wholly owned subsidiary of the Foundation, is the distributor of the products promoted by the Foundation and the Plan’s investment fund manager. It is authorized, with the assistance of its Investment Committee, to define the Plan’s investment policies and strategies, which is the definition of related parties for accounting purposes. The transactions concluded with Kaleido Growth during the year correspond to the administrative fees the Plan pays the company for its services as investment fund manager, and to the Foundation as the Plan’s promoter.

The Plan’s assets are invested and managed—pursuant to the investment policies adopted by Kaleido Growth’s Board of Directors—by two portfolio managers with the mandate to ensure growth. Annual portfolio management fees represent a declining percentage calculated on the total value of assets under management. These management fees total 0.14 % of assets under management for 2023.

Eterna Trust Inc. acts as a trustee and as such assumes custody and safekeeping of the Plan’s assets. It assumes control and acts on behalf of Kaleido Growth Inc. and the Foundation, carrying out their responsibilities, with the necessary adjustments, should either one refuse or be unable to act. For these services, the Plan pays Eterna Trust Inc. a fixed annual fee determined by contract. No director or officer of Kaleido Growth or of the Foundation has a material personal interest in this company.

Financial and Operating Highlights

The following table presents key financial data on the Plan; it is intended to help you better understand the Plan's financial results:

IDEO+ Conservative Plan		
<i>(in thousands of \$)</i>	Dec. 31, 2023	Dec. 31, 2022 (Period of 333 days)
Statement of financial position		
Total assets	\$ 66,042	\$ 30,525
Net assets	\$ 65,850	\$ 29,842
Changes in net assets (%)	120.66 %	- %
Statement of net and comprehensive income		
Net investment income	\$ 521	\$ 47
Realized and unrealized gains on investments	\$ 1,616	\$ (77)
Net income attributable to contracts	\$ 2,138	\$ (30)
Statement of changes in net assets attributable to contracts		
Net income/savings	\$ 1,710	\$ (10)
Net income/incentive	\$ 431	\$ (20)
Net Canada Education Savings Grant (CESG) received	\$ 7,620	\$ 5,287
Net QESI received	\$ 3,219	\$ 2,264
Others		
Total number of contracts in the plan	27,664	11,379
Change in total number of contracts	143.11 %	-

Administration Fees

The Plan pays an administration fee to the Foundation as the Plan's promoter, and to Kaleido Growth as the investment fund manager. The latter is responsible for managing the Plan's operations and activities. Furthermore, Kaleido Growth is responsible for establishing the Plan's investment policies and strategies with the guidance of its Investment Committee.

As of December 31, 2023, the annual administrative fees totalled \$ 71,288 and represented 1.9 % (including applicable taxes) of the Plan's assets under management.

Trustee and Custodian Fees

The Plan pays annual fees to Eterna Trust Inc. as the Plan's trustee. The fees paid to this trustee in 2023 amounted to \$ 718 and represented 0.002% of the Plan's assets under management. As the custodian, CIBC Mellon receives in trust the subscribers' savings and all other amounts to which the latter are entitled. The custodian acts as the guardian of securities and other instruments in which these amounts are invested, and as a third-party record keeper for the Plan. In 2023, the custodian's fee was \$ 22,792, which represents 0.06 % of the Plan's assets under management.

Independent Review Committee Fees

In 2023, the fee paid to the Independent Review Committee totalled \$ 959, which represented 0.002 % of the Plan's assets under management.

Portfolio Management Fees

AlphaFixe Capital Inc. and Montrusco Bolton Investments Inc. act as managers of the fixed-income portfolio, while Montrusco Bolton Investments Inc. manages the equity portfolio. In 2023, the fees paid to these managers came to \$ 53,194, representing 0.14 % of the Plan's assets under management.

Brokerage Fees

Brokerage fees paid to brokers represent a commission calculated as a percentage of the purchase or sale of securities. This percentage is determined by the broker and was \$ 5,630 in 2023, representing 0.01% of the Plan's assets under management.

U.S. Tax Fees

Since 2020, the Kaleido Foundation has been trading on the U.S. stock markets. The Internal Revenue Service charges an income tax on U.S. stock sales. In 2023, these fees amounted to \$ 2,507 or 0.01 % of the Plan's assets under management.

Past Performance

Annual Returns

The bar chart below shows the annual returns on all assets under management for the Plan for the last two years, 2022 and 2023. Note that this plan has been available since May 1, 2022. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

On May 1, 2022, the new line of IDEO+ plans became available.

Notes on Returns

The Plan's investment returns have been calculated using market values and time-weighted cash flows during the reporting period. Performance information assumes that all income earned, interest, and capital gains are reinvested in the Plan. Total expenses incurred by the Plan are presented and consist of administration and management fees, including the fees paid to the custodian, trustee, portfolio managers, and the Independent Review Committee, and any other expenses paid by the Plan, including taxes. Performance information does not take into account sales, redemption, distribution, or other optional charges that may have reduced returns. Past fund performance is not a guarantee of future results.

Compound Annual Returns

	Returns as of December 31, 2023, for a period of			
	1 year	3 years	5 years	Since creation
Gross Return at Market Value	6.52 %	n/a	n/a	4.41 %
Market Indices ¹	6.94 %	n/a	n/a	4.65 %
Total costs	2.12 %	n/a	n/a	1.82 %
Net Return at Market Value	4.40 %	n/a	n/a	2.59 %

¹ It should be noted that benchmarks exclude management fees incurred by an investor and the administration fee of a scholarship plan.

The relevant general benchmarks used for comparison are the same as those listed in the “Objectives and Investment Strategies” section and are briefly described below. They take into account current and past investment policies. A comparison between the returns achieved by the Plan’s funds and those of the market indices is presented in the “Operating Results for 2023” section.

As of December 31, 2023, the weighted benchmark index of the Plan was composed as follows, based on the value of the different funds and their respective investment policies, as previously described under the heading “Objectives and Investment Strategies”:

- FTSE TMX Canada Mid Term Provincial Bond Index (31.82 %)
- FTSE TMX Canada Short Term Corporate Bond Index (31.82 %)
- S&P/TSX Canada Large Cap Index (3.88 %)
- S&P/TSX Canada Small Cap Index (1.24 %)
- S&P 500 Large Cap Index (6.91%)
- S&P 600 Small Cap Index (1.30 %)
- 91-Day Treasury Bill¹ Index (23.03 %)

¹ The 91-Day Treasury Bill Index is used for money market investments. Otherwise, the performance index is adjusted to that of a high-interest bank account.

The FTSE TMX Canada Bond Indices used for the Plan measure the performance of Canadian fixed-income securities under several issuer segments (provincial or corporate bonds) and at various maturities (short- or mid-term). The provincial indices cover the bonds issued by the Canadian provinces as well as by the various Canadian municipalities. These securities are guaranteed by the provinces. The corporate indices cover the Canadian universe of corporate issuers with a credit rating equal to or greater than BBB.

The S&P/TSX Composite Index is Canada's leading stock market index. It covers approximately 95 % of the Canadian equity market and is the primary indicator of Canadian companies listed on the Toronto Stock Exchange.

The S&P/TSX Small Cap Composite Index is an excellent measure of performance for a small cap strategy in the Canadian equity market. The companies in this index are selected based on their capitalization-weighted index.

The S&P 500 Index is considered a good indicator of the performance of U.S. large-capitalization stocks. The index includes 500 leading companies and covers approximately 80 % of the market capitalization in the United States. As it is expressed in Canadian dollars, returns are not hedged for currency risk.

The S&P 600 Small Cap Index is considered a good indicator of the performance of U.S. small cap stocks. The index includes 600 leading U.S. companies that are selected based on their capitalization-weighted index. As it is expressed in Canadian dollars, returns are not hedged for currency risk.

Portfolio Overview

Breakdown of the Portfolio into Subgroups

The Plan's investment portfolio comprises three distinct groups, as illustrated in the following pie chart. The chart also presents the percentage of the portfolio's total value invested in each of these groups.

Did you know that...

A RESP is, by definition, a long-term investment vehicle. The performance of the Plan should therefore be measured over a period of approximately ten years.

Top Holdings of the IDEO+ Conservative Plan Portfolio

The table below presents the main holdings of the portfolio on December 31, 2023. It should be noted that these are all presented from a long position. Our investment policy stipulates that margin buying and short sales are not permitted. It should also be noted that portfolio managers were allowed to invest in indexed securities, such as ETFs (exchange-traded funds), until they had accumulated sufficient assets per strategy. This temporary strategy was used to facilitate portfolio diversification early in the life of the IDEO+ plans.

Also note that the portfolio overview can change as a result of the operations carried out by the fund, and you are therefore advised to consult our interim financial statements.
